OUTLOOK:

Monsoonal moisture will continue to flow over the Four Corners states causing scattered thunderstorms across most of New Mexico, Arizona, Nevada and Utah.

An upper low pressure area near San Francisco will start to move northeast. This low will force monsoonal moisture into eastern Oregon and southern Idaho late Monday afternoon and evening, producing scattered to isolated thunderstorms.

California, western Oregon and Washington will have costal low clouds, fog and drizzle with a chance of showers and thunderstorms along the Sierra Nevada and Cascade Range.

High temperatures will be 60's to 70's along the coast, 80's and 90's inland and in the mountains and up to 112 in the deserts.
